DFS Dryer- Full- Service

Information

The average gives the world its existence,
the extraordinary their value.
(Oscar Wilde)

Service for your dryer

**Reactive, preventive, proactive or predictive
Repair, inspection, maintenance and improvement**

geared towards needs and benefits

The absolutely only and correct concept does not exist unfortunately. The reasonable mix and distribution of the different maintenance and repair concepts results in success.

Suitable services for your different maintenance and repair concepts:

1. DCS Dryer Condition Service. We check your dryer once or at reasonable intervals for abnormalities, problems and malfunctions. If we find something, we document it in a list of working points and a detailed report. On the basis of our report and the working-point list we create together a plan for how to proceed. If possible, we will immediately remedy any defects found. We offer this service at a flat rate including travel and incidental costs.
2. DMS Maintenance Service. During your maintenance shifts or annual maintenance, we carry out repair work based on the list of work points. We proactively replace components with meaningful and economic aspects. So you have the best reliability for many months. In order to have the greatest efficiency and the best cost-benefit ratio, it makes sense for customers who do not have a dryer condition service to have an inspection carried out by us four to six weeks before maintenance. This can ensure that we can solve all problems. This service is billed according to our current table for hourly rates and additional costs. We will be happy to send them to you on request, together with our spare parts list.
3. MTS Mematech Technical Service. You identify a problem and contact us. First we try to help you by phone. If our telephone support does not lead to success, the next mematech technician will analyze and fix it on site. This service is billed according to our current table for hourly rates and additional costs. We will be happy to send them to you on request, together with our spare parts list.

Other services for your dryer:

1. Fast and inexpensive supply of wear and spare parts
2. Sale of high quality silicone application rollers
3. Advice and sale of alternative and better spare parts
4. constructive improvements
5. Exhaust measurement
6. Fan wheel repairs including welding, sandblasting, painting and fine balancing
