

WUP Web Up Roller

Productdescription

The average gives the world its existence,
the extraordinary their value.
(Oscar Wilde)

WUP Web Up Roller

Practical paper feed device in the folder structure

Pulling the paper web through the folder structure takes time and personnel. Most of the time, the entire machine crew is required.

With the WUP Web Up Roller, you reduce both the time previously required and the personnel expenditure. These savings are considerable, particularly in productions with several ribbons, since the ribbons can now be pulled in by only two employees. The rest of the machine crew is at the time available for other activities.
