

MSS mematech System Service

Information

The average gives the world its existence,
the extraordinary their value.
(Oscar Wilde)

Service für Ihre mematech Anlagen

Ihre Anlage braucht uns manchmal

Suitable services for your different maintenance and repair concepts:

1. MCS Mematech Condition Service. We check your mematech systems at reasonable intervals. If we find something, we try to solve the problem immediately. If this is not immediately possible or makes sense, suggest an appointment on which we can repair your system. We offer this service at a flat rate including travel and incidental costs.
2. MMS Mematech Maintenance Service. During your major maintenance over several days, our service technician inspects your mematech system and carries out the necessary repairs, calibrations, etc. Our technician has any spare parts that may be required on site or we will send them to you during downtime. This service is billed according to our current table for hourly rates and additional costs. We will be happy to send them to you on request.
3. MTS Mematech Technical Service. You operate your system until you find an error and contact us. If our telephone support does not lead to success, the next available technician will then analyze and fix it on site after arrival. This service is billed according to our current table for hourly rates and additional costs. We will be happy to send them to you on request.

In addition to services 1 to 3, we offer you access to our service and documentation system. We would be happy to present this system, with further advantages, to you personally.
